To: k.long@imperial.ac.uk

Dear Professor Long,

ST/T002638/1 - Advanced concepts and novel technologies for the study of the impact of ionising radiation on tissue

Thanks for submitting the above application to the Opportunities Call 2019, the introducers have now reviewed your application and raised the following clarification questions :

- 1) Please clarify the status of the work already underway at CCAP on the LhARA CDR, and what is required to bring it to completion.
- 2) Please also clarify the work required to upgrade the CCC beamline to facilitate FLASH.
- 3) The project covers 24 months, while funding is requested for two PDRAs for 6 months each. Please clarify the project plan ; what work the PDRAs will do, and when, and what work is required by other researchers.
- 4) Clarify the value added by this proposal to the overall LhARA project.

Please use up to a maximum of two pages (A4 size) to respond to these questions and forward both the response and the requested two page introductory slides (pdf version) by email, before Wednesday, 03rd July 2019.

Following details needs to be included within the two introductory slides (pdf document) :

1. Project Title
2. Aims and objectives of the project
3. Details of the requested resource

Please don't hesitate to contact me if you need more information

Thanks for your time and help

Regards

Roy Stephen
